Experience the full potential of your data

- **Highly-scalable, enterprise reporting:** Increase your customers' satisfaction and retention. Get better business results. Build complex, operational reports with pixel perfect graphics and charts. WebFOCUS reports have deep integration with Microsoft Office allowing you to export multi-page, compound reports to Excel, PowerPoint, PDF and more.

- **Schedule and distribute to the masses:** Use our scheduling and distribution tools to disperse boardroom quality reports and consumer facing apps to countless stakeholders inside and outside of your organization.

- **Embedded analytics:** Add value to your business applications by embedding dashboarding and reporting directly into your existing applications. Embed any ibi WebFOCUS Analytics component or self-service tool into any application with full support for security, rebranding, and white labeling. Want to embed all of ibi WebFOCUS Analytics into your application? You can do that too with our native support for White Labeling that allows you to brand the platform your way.

- **Large scale deployments:** Deploy on a platform designed to scale to whatever size you need it to be. Whether it's 500 users or 15 million users, there's no question about it—we deliver..

- **Deploy in any cloud, any way:** ibi WebFOCUS Analytics can be deployed in the cloud of your choice, exactly how you need it. Want to deploy in a hybrid model? We have that covered too.

- **AI fueled analytics:** Quickly answer business questions through the use of Natural Language Queries (NLQ). Instant Insights uses dominance, correlation and time series algorithms to find signals in your data and communicates them back to stakeholders as data stories. Confidently make informed decisions, anticipate the likelihood of an event occurring, and strategize to ensure the best outcomes.

- **Simplify and automate data extraction and integration:** Extract data from any data source through our optimized named adapters or generalized ODBC, JDBC, and API connections. Transform data to achieve consistency with virtual columns in a master file description, source transformation in the flow, SQL calculation, and target transformation. Load into data targets like Relational or columnar databases, Flat files, delimited files, or XML.

Learn more about ibi™ solutions, and how we enable the world's largest enterprises to harness the power of data to drive informed decision-making across their organizations.

ibi.com
