

ibi™ Data Intelligence 2.0

Unify, trust, and accelerate your data value chain.

Now a part of the ibi™ WebFOCUS® Data & Analytics Platform:

- **ibi™ WebFOCUS®**
 - WebFOCUS Hub
 - Designer
 - ReportCaster
 - Reporting Server
 - DSML Services
- **ibi™ WebFOCUS Container Edition**
- **ibi™ Data Migrator**
- **ibi™ Data Intelligence**
 - ibi Data Quality
 - ibi iWay Service Manager
 - ibi iWay Trading Partner Manage
 - Data Integration & Master Data Management

Plus, get:

- **Unlimited usage & environments**
- **All add-ons & adapters**

Data you can trust that's ready when you need it

For In an era where AI readiness and real-time decision-making marks the distinction between the success or stagnation of a business, poor data quality remains a multi-million dollar liability. The recently released, ibi Data Intelligence version 2.0, now a part of the ibi™ WebFOCUS® Data & Analytics platform, unifies application integration, data quality, and master data management (MDM). By bridging the gap between technical complexity and business utility, version 2.0 empowers all users to transform fragmented data into a governed, strategic asset in record time.

Data Intelligence brings together ibi's broad set of capabilities to create a unified, end-to-end data management solution. It provides a unique offering to support the entire lifecycle of data and analytics projects and deliver business value from a single vendor solution. Because the broad set of capabilities are integrated, organizations will benefit from cost savings, faster onboarding and reduced development costs compared to working with multiple vendors and solutions.

Now is the perfect time to start on your ibi Data Intelligence conversion. Our team of experts is here to guide you through the process.

An intelligent data platform built to address your top data challenges

The high cost of bad data

Poor data maturity can drain between 12% and 20% of a company's total revenue.

Data silos and M&A hurdles

Critical data is often trapped in departmental silos (CRM, ERP, Mainframe), delaying integration during mergers or strategic shifts.

The AI trust gap

Over 70% of organizations are adopting modern DQ solutions specifically to ensure their Generative AI and autonomous agents provide reliable, context-aware recommendations.

Regulatory complexity

With over 140 countries enforcing privacy laws (GDPR, CCPA), centralized data lineage and consent management are no longer optional.

Core Capabilities

ML-Driven Data Quality & Deduplication

Data Intelligence 2.0 takes you from manual, script-heavy mastering to Machine Learning-driven deduplication.

- **A data strategy for all:** Business users can now train ML models to identify golden records via an intuitive UI.
- **Automated profiling:** Instantly discover data characteristics, scores, and anomalies to identify sensitive data or quality gaps.
- **No more alert fatigue:** Stop drowning in millions of individual error tickets—a single actionable ticket is generated when data falls below quality thresholds, enabling source-level fixes before repository entry

Unified Application & Data Integration

Leveraging the robust integration of ibi™ iWay® Service Manager and ibi™ Data Migrator, the platform enables any-to-any connectivity across disparate environments to ensure seamless data synchronization. Then, use that trusted data in ibi™ WebFOCUS® for reporting and BI dashboards:

- **Any-to-any connectivity:** Seamlessly connect messaging systems, event-driven architectures, and legacy databases.
- **Data engineering:** Integrate data to develop, manage, and optimize data pipelines for analytical purposes.
- **Runtime bundles:** Package data quality rules and ML models into runtime bundles for immediate deployment into the Data Integration Server (formerly Omni-Gen®).

Core Capabilities Continued

Low-Code / No-Code stewardship

ibi Data Intelligence 2.0 empowers non-technical users to manage data pipelines through a streamlined stewardship interface, reducing reliance on specialized IT resources:

- **No-code UI:** Profile, cleanse, and dedupe data without a dedicated IT project with our out of the box data rules.
- **Python extensibility:** While optimized for no-code, the platform remains fully extensible with widely adoptable Python routines for complex, custom logic.

Why Data Intelligence?

- **Real-time ROI:** Companies utilizing real-time data for AI see a 35% increase in operational efficiency.
- **Modernized data governance:** A formalized glossary of terms and centralized data collaboration ensures organization-wide trust.
- **Peak operational efficiency:** Increase operational efficiency gained by optimizing resource allocation and utilization
- **Future-proof your data infrastructure:** Version 2.0 sets the foundation for AI-enhanced transformation and improved observability in future iterations.

The Data Intelligence Advantage: We help you win with your data		
Core benefit	ibi Data Intelligence 2.0	Other data products
Time to Value	3–6 Months average implementation	12–18 Months
User Persona	Business Users & Data Stewards	Specialized IT Developers only
Licensing	Unlimited consumption and usage	Unpredictable and expensive consumption based pricing
Deployment	Flexible: On-Premise, Cloud, or Hybrid	Limited support for hybrid multi-cloud and on premises deployments
AI Readiness	Native ML model training & structured metadata	Requires additional bolt-on tools

Experience the ibi difference

Don't let fragmented data stall your innovation. Data Intelligence 2.0 is designed to grow as you do, evolving alongside your needs and easily scaling to meet your most critical data needs. curate clean. Use our data solution to help you create the governed datasets vital to your organization's downstream AI, data science, and reporting initiatives.
