

ibi™ Mainframe

Modernize Your Mainframe, Liberate Your Data

What's included in ibi™ Mainframe:

- **ibi™ FOCUS**
- **ibi™ WebFOCUS**
- **ibi™ Open Data Hub for Mainframe**
- **ibi™ Data Migrator**
- **ibi™ iWay Service Manager**
- **Plus, get:**
 - Unlimited users and usage
 - All add-ons included, including adapters/connectors, and FOCUS Studio
 - Gold or Silver support

What is ibi™ Mainframe?

The ibi™ Mainframe product suite is a comprehensive solution specifically designed to empower organizations in their mainframe modernization journey. This robust suite combines five key ibi products to address the challenges of data integration, management, analysis, and visualization within a mainframe environment, enabling a smooth transition to a modern data-driven architecture.

ibi Mainframe includes our recently released FOCUS Studio, our groundbreaking new tool that allows users to access their mainframe systems from a web-based interface. Through FOCUS Studio, users can create or modify code in their existing application in an intuitive interface.

Modernizing your mainframe environment can unlock a host of benefits, from cost savings and increased agility to improved data accessibility and enhanced security. By leveraging modern technologies and integrating your mainframe into a contemporary data architecture, you can position your organization for future growth and innovation while maximizing the value of your existing investments.

Connect effortlessly, simplify user access,
and ensure compliance and security with ibi
Mainframe

Key Features & Benefits for Mainframe Modernization:

Some of the key features and benefits of mainframe modernization include:

Extend the Value of Existing Investments: Leverage existing FOCUS skills and applications while modernizing access and delivery of information through WebFOCUS.

Unlock Mainframe Data: Make mainframe data readily available to modern analytics tools, cloud platforms, and users across the organization.

Hybrid Integration: Seamlessly integrate mainframe data with cloud and on-premises systems to create a unified data ecosystem.

Improved Agility: Respond faster to business needs with streamlined data access and analysis.

Reduced TCO: Optimize mainframe resources and reduce operational costs by leveraging modern technologies and eliminating redundant processes.

Enhanced Security: Maintain robust security for your mainframe data while extending access to authorized users through modern authentication mechanisms.

Future-Proof Your Data Strategy: Position your organization for future growth and innovation by integrating your mainframe into a modern data architecture.

Core components of ibi™ Mainframe:

The ibi™ Mainframe product suite is designed to optimize and modernize your mainframe environment. These core components available to your organization through the ibi™ Mainframe offering enhances data accessibility, streamline reporting, and simplify integration with modern platforms—ensuring that your mainframe remains a valuable asset in your data strategy.

- **ibi™ FOCUS®:** A high-performance, fourth-generation language (4GL) for reporting and data analysis. FOCUS® allows users to easily access and analyze mainframe data with minimal coding, providing a familiar tool for seasoned mainframe professionals while also offering a bridge to modern analytics.
- **ibi™ FOCUS® Studio:** FOCUS® Studio, a new part of ibi FOCUS, is a state-of-the-art browser interface for mainframe FOCUS applications. It enables users to connect to their mainframe data directly from their browser. Additionally, in FOCUS Studio, users can create and modify their existing application code.

Core components of ibi™ Mainframe, continued:

- **ibi™ WebFOCUS®:** Modernize your FOCUS reporting by delivering interactive dashboards and visualizations through a web-based interface. ibi WebFOCUS for mainframe extends the reach of mainframe data to a broader audience, enabling users to create and share insights from anywhere with a web browser, regardless of their location or device.
- **ibi™ Open Data Hub for Mainframe:** Break down data silos by integrating your mainframe data with other data sources. Open Data Hub for Mainframe provides a single point of access to data across the mainframe and other platforms, including cloud and on-premises systems, empowering users to combine and analyze data from various sources for a holistic view.
- **ibi™ Data Migrator:** Build your cloud migration strategy or data warehouse modernization initiatives. Data Migrator simplifies the process of moving data from legacy mainframe systems to modern platforms, ensuring data integrity and minimizing downtime during the transition.
- **ibi™ iWay® Service Manager:** Facilitate real-time data exchange and connectivity with an integration platform that links your mainframe resources to the rest of the enterprise. iWay® Service Manager enables users to design workflows that access, transform, and enrich mainframe data and make it accessible with modern APIs.

ibi Mainframe: Your Gateway to the Mainframe of Tomorrow

Moving to the ibi Mainframe platform offering offers a strategic advantage for organizations looking to unlock the value of their mainframe data and embrace modern data management and analytics practices. This comprehensive suite of products provides the tools and capabilities needed to integrate, manage, analyze, and visualize mainframe data within a modern, hybrid environment—ensuring a smooth and successful modernization journey.

Learn more about **ibi™ solutions**, and how we enable the world's largest enterprises to migrate to the cloud and harness the power of data to drive informed decision-making across their organizations.
