- **ibi™ WebFOCUS Container Edition**
- **ibi™ Data Migrator**
- **ibi™ Data Intelligence**
  - ibi Data Quality
  - ibi iWay Service Manager
  - ibi iWay Trading Partner Manage
 - Data Integration & Master Data Management

Plus, get:

- **Unlimited usage & environments**
- **All add-ons & adapters**

The next step in the evolution of data driven decision making

In today's fast paced business environment, the ability to transform raw information into strategic action is a necessary competitive advantage. However, many organizations continue to struggle with fragmented data landscapes that prevent a clear view of performance. The ibi™ WebFOCUS® Data & Analytics Platform addresses this challenge by bringing together the enterprise analytics of ibi™ WebFOCUS® and the modern data management of ibi™ Data Intelligence, providing the tools necessary to manage the entire data value chain. From the initial integration and cleansing of disparate sources to the final executive visualization, we help you build a culture of data certainty.

Are you a longtime ibi™ WebFOCUS user? The new ibi WebFOCUS Data & Analytics Platform includes WebFOCUS, WebFOCUS Container Edition, WebFOCUS DSML Services, ibi Data Intelligence, Data Quality, iWay Service Manager, and all of the other add-ons, extras, and adapters previously sold separately and in fixed quantities—now in an unlimited format. This translates to unlimited users, usage, and environments. Use ibi WebFOCUS Analytics to increase your business acumen and drive your organizational success to new heights.

Get access to unlimited scalability & connectivity through the ibi WebFOCUS Data & Analytics Platform. Designed for tremendous scalability, the platform powers deployments with over 15 million+ users. Equipped with native support for scheduling and distribution, burst and distribute content directly from WebFOCUS to anyone, anywhere, at anytime. Use the ibi WebFOCUS Data & Analytics Platform to build and embed reports, dashboards, and portals. Connect data from virtually any source with 75 read/write adapters. Plus, with the addition of Data Intelligence, trust your data from the start.

Solving the analytics trust gap

Visualizations are only as reliable as the data behind them. Fragmented silos and poor data quality cost organizations millions and stall AI initiatives. To compete, businesses need a strategy that ensures data integrity before it reaches the reporting layer. By pairing WebFOCUS® with Data Intelligence, organizations ensure that their dashboards are fueled by governed and mastered information.

Strategic product capabilities

ibi Data Intelligence
The latest version of ibi Data Intelligence, v2.0, introduces machine learning deduplication to simplify the mastering process. Rather than requiring users to know and apply complex rules, business users can train models to identify and merge records into a single Golden Record. This no-code approach allows citizen users to profile and cleanse data sets through an intuitive interface. It bridges disparate systems and cloud apps using over 200 native adapters.

ibi™ WebFOCUS®
WebFOCUS (current version 9.3.6) remains the industry standard for high-scale enterprise reporting. It allows you to deliver boardroom quality reports and self-service dashboards to thousands of users both inside and outside your organization. The platform enables you to embed analytics directly into your own applications, providing a consistent experience for your customers.

AI and DSML services
Clean data is the fuel for the Data Science and Machine Learning services in WebFOCUS. Data Intelligence provides the governed, and the structured metadata required to ensure your predictive models and AI agents are accurate and compliant. This combined approach ensures that AI initiatives are built on a foundation of trust.

Why the integrated offering wins

Accelerated timelines
The streamlined tools in Data Intelligence reduce typical Master Data Management and Analytics project cycles from 18 months down to just 3 or 6 months.

Stability with Long Term Support releases
We prioritize enterprise stability through our Long Term Support (LTS) release strategy. These versions offer a predictable lifecycle with focused maintenance. This ensures that your mission-critical applications remain secure and operational without the need for frequent or disruptive updates.

Democratized governance
Move the power of data management out of the IT bottleneck. We put the tools for data quality into the hands of the business experts who know the data best, allowing them to prepare data that is then consumed by WebFOCUS.

Transform your business through trusted data and analytics

As you navigate the complexities of digital transformation and the increasing demands of AI, the ibi WebFOCUS Data & Analytics Platform stands as your partner in success. ibi is committed to providing the stability, scalability, and innovation required to turn your data into your most valuable strategic asset. By bridging the gap between raw data and actionable insights, we empower your organization to make better decisions faster and with total confidence.

Learn more about **ibi™ solutions**, and how we enable the world's largest enterprises to migrate to the cloud and harness the power of data to drive informed decision-making across their organizations.
