

ibi Open Visualizations empowers any visualization tool with all of the benefits of data virtualization – real-time, direct access to data without the need for an expensive data warehouse. It supplies connectivity to any enterprise data source. Make better decisions with better data, all while using the tool your business users are already familiar with.

- > **Install once and configure at scale.** Install and configure multiple data connections on one server with little data preparation effort
- > **Easily establish secure data management and architecture standards.** Take control of your data without undertaking a large data mastering project
- > **Power up your dashboards with scalable, integrated data.** Cross-database joins let you query and treat multiple data sources as one
- > **Make it easy for end users.** Provide a native and single connection to trusted data with real-time access

## About ibi

ibi is a data and analytics company that embeds intelligence into — everything. From the beginning, ibi has known the importance of data and insights to make better decisions. We help organizations get their complex and disconnected data in order, so they can build, embed, and automate intelligence into everything they do. By preparing organizations for the future and turning them into builders – information builders – everyone can use enterprise trusted data at scale to drive their growth. Whether our customers use pre-built applications or build their own solutions for their data and analytics challenges, ibi powers their innovation and reinvention. ibi's open platform and industry-specific building blocks accelerate speed to market, improve operational efficiency, and enhance their customers' experience.

**ibi. build a better future.**
